NODAK CROP INSURANCE NEWS

FARGO, NORTH DAKOTA

UNITED STATES DEPARTMENT OF AGRICULTURE

1958 Edition No. 9

April 8, 1958

SALES - We are in the final phase of our 1958 sales campaign. Clean-up work is all that remains to be done in most counties but from the looks of the number of sales in some counties we wonder if the campaign ever really got underway in those counties. As you prepare the sales report, we urge all of you to give thought to the things that you should have done which would have improved the effort in your county. Make notes and as we go into the 1959 campaign, and you can do that immediately after the close of this campaign, profit by the mistakes you made.

Art Jorgensen is now leading the barley counties but Nat Crockett is over-all leader with more than 400 sales.

FORMS 412, 812, 812A - Submit as soon as possible and also clean up suspended cases without delay.

TERMINATED CONTRACTS - As of this date we have not determined the number of contracts that will terminate because of unpaid debts.

We will give you the figures later on.

ACREAGE REPORTS - Still no procedure that we can send you. But we do plan to hold meetings as soon as possible.

April 8, 1953

April 8, 1953

Dear Mr. [Name],

I am writing to you in regard to the [Subject] which you have mentioned.

As you know, the [Subject] is a very important one and it is one which we are all interested in.

I am sure that you will find the information which I am giving you very interesting.

I am sure that you will find the information which I am giving you very interesting.

I am sure that you will find the information which I am giving you very interesting.

I am sure that you will find the information which I am giving you very interesting.

I am sure that you will find the information which I am giving you very interesting.

I am sure that you will find the information which I am giving you very interesting.

I am sure that you will find the information which I am giving you very interesting.

I am sure that you will find the information which I am giving you very interesting.

I am sure that you will find the information which I am giving you very interesting.

I am sure that you will find the information which I am giving you very interesting.

I am sure that you will find the information which I am giving you very interesting.

I am sure that you will find the information which I am giving you very interesting.

I am sure that you will find the information which I am giving you very interesting.

I am sure that you will find the information which I am giving you very interesting.

CHICAGO MEETING - The meeting of State Directors and Office Managers last week was the best that we have ever attended. The Board of Directors was present for almost the entire meeting. The opportunity to meet with the Board and with our fellow-workers from over the entire Nation will prove beneficial to all of us. Our discussions of mutual problems and those that are of interest only to our area will lead to a better understanding among us. We are certain that in the not too distant future the things that were accomplished at the meeting will be apparent to all.

REAPPRAISAL - We are enclosing your copy of a new pamphlet entitled "A Re-appraisal of the Federal Crop Insurance Program". Many of you have requested copies after seeing the District Supervisor's. I would recommend that you study it very carefully. To me it looks as though better things are at hand for Crop Insurance. It should raise your spirits after a hard sales campaign which is almost over, but don't quit until the final bell rings.

FARGO, NORTH DAKOTA

UNITED STATES DEPARTMENT OF AGRICULTURE

NODAK CROP INSURANCE NEWS

1958 Edition No. 10

April 16, 1958

SALES - In just a few hours the 1958 campaign will be history. We hope that the additional time permitted all of you to complete the contact work that you wanted to do. The reports that are a part of the Nodak News show just what each agent has done to date. You can readily determine the leaders.

FORMS 412, 812, 812A - Again we want to remind you that these forms must be transmitted promptly. We would like to have every 412, 812 or 812A in this office by Tuesday, April 22 so that we can complete processing them without delay. If you have any suspended cases to clear up, please do so immediately.

CANCELLATION COUNT - The cancellation figures have been adjusted to reflect the contracts terminated due to unpaid debts and any other cases not counted before. We lost over 400 contracts due to unpaid 1957 premiums. While this is better than we had expected it is nevertheless a large loss of business that was not replaced with new sales.

March 14, 1938

Mr. Nathan W. ...

... in that ... the ...

...
...
...
...

LISTS OF TERMINATED CONTRACTS - We are sending you your copies of the Forms 15 and Forms FCI-812A for the contracts terminated due to unpaid debts. Please review and if you find any errors, advise us immediately.

ACREAGE REPORTS - We don't know what has happened to the printed procedure that we were supposed to get for your use in preparing wheat, flax and barley reports but as of now it just hasn't reached us. We are planning to discuss acreage reports with the District Supervisors at our meeting with them on Thursday and Friday and they will be able to tell you how to handle reports. We want to remind Multiple Agents that the same procedure and forms used in 1957 are to be used in 1958.

NODAK CROP INSURANCE NEWS

FARGO, NORTH DAKOTA

UNITED STATES DEPARTMENT OF AGRICULTURE

1958 Edition No. 11

May 9, 1958

SALES - The reports for each Supervisor's area show what happened in that area with respect to cancellations and sales for 1958.

We have more wheat covered in Bottineau and Griggs counties for 1958 and held our own in McHenry county. In all of the other counties we lost business.

Our flax business increased in Bottineau, Nelson, Pembina and Stutsman counties. Several other counties were very close to maintaining their 1957 business. Cavalier county did a good job of selling flax insurance as a new crop in that county.

Cass and Pembina counties show an increase in barley insurance. The new counties, Cavalier, Walsh and Williams showed that insurance on new crops can be sold.

Sales in Multiple counties were down and none of the counties were able to maintain the 1957 level of contracts in force.

The 1958 sales campaign is history but the 1959 campaign should be underway. Stamped applications can be used, as you know, until the coverages and rates are available.

ACREAGE REPORTS - We have already received more than 200. Most are properly prepared but we would suggest that all agents read the procedure again and check reports against it. It will save suspensions and exceptions if you do.

CHANGE IN PHONE NUMBER - The number of the State Office is now -

ADams - 2-3941

* * * * *

The poem below was composed by Irvin Pellet, District Supervisor for Southwest Iowa:

"DIG DEEPER"

Said the little red rooster: "Believe me, things are tough.
Seems that worms are scarcer, and I cannot find enough;
What's become of all those fat ones is a mystery to me;
There were thousands through that rainy spell, but now where
can they be?"
Then the old black hen who heard him did not grumble or complain.
She had gone through lots of dry spells, she had lived through
floods and rain.
So she flew upon the grindstone, and she gave her claws a whet,
As she said, "I've never seen the time there were no worms to get."
She picked a new and undug spot, the earth was hard and firm.
The rooster jeered: "New ground! That's no place for a worm."
The old black hen just spread her feet, she dug both fast and free.
"I must go to the worms," she said, "the worms won't come to me."
The rooster vainly spent his day, through habit, by the ways
Where fat round worms had passed in squads back in the rainy days.
When nightfall found him supperless, he growled in accents rough,
"I'm hungry as a fowl can be. Conditions sure are tough."
He turned then to the old black hen, and said, "It's worse with you;
For you're not only hungry, but you must be tired, too.
I rested while I watched for worms, so I feel fairly perk.
But how are you? Without worms, too, and after all your work?"
The old black hen hopped to her perch and dropped her eyes to sleep,
And murmured in a drowsy tone, "Young man, hear this and weep:
I'm full of worms and happy, for I've eaten like a pig.
The worms are there as always, but, boy, I had to dig."

and the other side of the mountain.

It is a very beautiful view.

1. The first part of the report is a general introduction to the subject of the study. It should state the purpose of the study, the scope of the study, and the methods used. It should also state the significance of the study and the contributions it makes to the field.

2. The second part of the report is a detailed description of the data collected. This should include a description of the sample, the instruments used, and the procedures followed. It should also include a description of the results of the data analysis.

3. The third part of the report is a discussion of the results. This should include a comparison of the results with the hypotheses, a discussion of the strengths and limitations of the study, and a discussion of the implications of the results for the field.

4. The fourth part of the report is a conclusion. This should summarize the main findings of the study and state the overall conclusions. It should also include a statement of the limitations of the study and a statement of the directions for future research.

NODAK

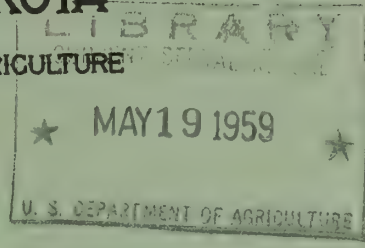

CROP INSURANCE

FARGO, NORTH DAKOTA

UNITED STATES DEPARTMENT OF AGRICULTURE

NEWS

1958 Edition No. 12

July 2, 1958

SALES - The following is from the Washington Report to the Field, dated
June 20, 1958.

"We are now receiving reports of severe spot losses in some areas. The reports of favorable crop prospects have become marred here and there by disasters due to such risks as EXCESS MOISTURE, FIRE AND HAIL."

"Indiana reports severe and extensive damage due to abnormal rains. In many fields they have excessive moisture to a degree that all drainage outlets are filled and water is standing on the fields. Some counties are reporting as much as 40 percent of the total spring crops destroyed. The State Director reported driving through a group of northern counties where there was hardly a field of corn or soybeans in any of the counties that had not been at least partially damaged or destroyed. In many instances, 25 percent to 75 percent of the crop had been destroyed."

"Nebraska called regarding a hail storm that covered a large area with one strip three to five miles wide in which wheat just about two weeks away from harvest was totally destroyed leaving fields that had been good wheat crops looking like plowed ground."

"Fire has been destroying an unusual number of wheat fields in Oklahoma during the harvest."

"These spot loss situations offer an excellent opportunity for insurance publicity. If we have insurance in the area where they occur, we can give the editors an estimate of the amount of loss we may pay along with an estimate of the amount that we would pay if all farmers in the area affected had crop insurance. We might also get a news item used calling to the attention of FCI policyholders that the particular risk that struck is among the many risks insured against under our BROAD coverage."

"These spot losses emphasize why the farmer needs all-risk protection every year.....because we don't know and they don't know where or when. Some of our people get to be such experts on coverages and rates that they overlook the fact that we must be prepared to pay the farmer a total loss when it strikes and it can be the first year of his protection.....too often it was in the past when we gave them until the closing date to outguess us in a year of deteriorating crop prospects."

"Emergency assistance requests from disaster areas to the Government here also emphasize the need. We've got the "do-it-yourself answer" to this farm problem. Let's do a better job of getting this message across. Its a very important responsibility we have. We need some strengthening to carry it properly in all states and supervisors' areas."

I made a tour of our Northern counties last week and many claims will be paid in North Dakota because of the drought condition which exists at this time. In addition, hail has been hitting various parts of the State and losses will be paid as the result. Wind damage was quite severe in some areas this spring.

Every Agent where damage to crops has occurred should be able to build up some local publicity that can be used as a sales aid for 1959. For example, when a good farmer files a final FCI-8 before harvest starts and a large indemnity check will be involved, ask him what he thinks about crop insurance protection

now. Try to get him to give us a testimonial then or at the time he receives his check. Have the adjuster flag the case as a special one and we will give it preferred handling so that the insured can get his money before harvest is general. We may be able to deliver his check to him in person and take pictures that could be used as part of a local news article and also as part of the testimonial.

If we can build up local cases in each county, they will be of greater value to you than ones from some other state or even another county in our State. As has been said so often before, let's make the most of our local causes of loss: drought, insects, hail, wind, etc. and make our own sales aids for the future.

Discuss this with your District Supervisor and you may come up with other publicity ideas.

Some Agents have already sold and submitted applications for 1959. In counties where more than one crop is insured, adjusters can carry forms FCI-812A with them and sign insureds up for the crops that are not insured and which would be "add on" business.

By starting now every county can get information together and make sales which will increase business for 1959. Loss of business is a serious matter in North Dakota and we can't afford to lose any more. Selling should be a continuous job in your county.

ACREAGE REPORTS - The attached listing shows where each county stands with respect to reports submitted to this office as compared to the contracts in force.
